PROFILE

AI and Information Systems Governance engineer trained at ENSAO, specialized in AI, Data Science, BI and information systems. Oriented toward intelligent automation, data analysis and reliable business deliverables, with a strong focus on confidentiality, traceability and operational value.

PROFESSIONAL EXPERIENCE

AI Engineer (Final-Year Internship) Feb. 2026 – Aug. 2026
Tessi Oujda – Multi-agent orchestrator for client integration automation

- Designed a LangGraph-based multi-agent orchestrator to automate repetitive tasks in the client integration process.
- Processed documents linked to Digital Invoice, an e-invoicing platform: DSF, test workbooks, transfer matrices and XML/JRXML files.
- Implemented a RAG and document chunking approach to provide agents with useful context from each DSF.
- Developed Recette, Transfer and JasperReports modules with Python, FastAPI, React, TypeScript and Ollama.

Data Engineer & Data Scientist Jul. – Sep. 2025
TE Connectivity – Intelligent skills analysis system

- Implemented automated ETL pipelines for HR data collection and cleaning (Python, Pandas, Airflow).
- Designed a PostgreSQL Data Warehouse and profile recommendation algorithms (Scikit-learn).

Data Analyst & BI Jul. – Aug. 2024
Northern Development Agency – Institutional project monitoring dashboards

- Structured the decision-making data warehouse and migrated data (Talend, Python, SQL).
- Developed KPIs and interactive decision-support reports (Power BI, DAX).

KEY SKILLS

BI & Big Data	Power BI Talend
Data Science & AI	Python Pandas Scikit-learn TensorFlow SQL
Agents & LLM	LangGraph RAG Ollama FastAPI XML/JRXML Document Processing
ERP & CRM	Odoo Salesforce Deployment Module Customization
Development	React.js TypeScript Laravel PHP MySQL PostgreSQL
Languages	Arabic (native) French (fluent) English (professional)

ACADEMIC & PERSONAL PROJECTS

Sales Prediction System & Stock Optimization Deep Learning – 2025

- Odoo + AI architecture for Supply Chain automation, LSTM/Prophet 90-day forecasts (87%) and Plotly Dash/REST API dashboard for +50k transactions.

Computer Vision: Automated Damage Detection Deep Learning – 2025

- CNN model for vehicle image segmentation and multi-class damage classification with TensorFlow/OpenCV.

Predictive System Development with MLOps Pipeline ZenML, Python – 2025

- Reproducible ML pipeline for price prediction, data preparation, model training and API deployment.

Movie Recommendation Engine Machine Learning – 2024

- Collaborative filtering with SVD on MovieLens 1M, comparative evaluation and optimization with Surprise/Scikit-learn.

PROFESSIONAL CERTIFICATIONS

Google	Advanced Data Analytics Professional Certificate Business Intelligence Professional Certificate
Oracle	Data Science Professional AI Vector Search Professional Generative AI Professional Analytics Cloud Professional Cloud Infrastructure Certified DevOps Professional
Salesforce	Sales Operations Professional
Development	Full-Stack Web Development with Laravel & PHP

EDUCATION

Engineering Degree – AI & Information Systems Governance 2021 – 2026
National School of Applied Sciences of Oujda (ENSAO)

Baccalaureate in Physical Sciences – High Honors 2021
Ali Ben Berry High School – Taza
